## STATEMENT

---

Jinxian Wu is a third-year Ph.D. student at the BIT. His research focuses on distributed model predictive control (DMPC), specifically on the iterative DMPC methods for linear/nonlinear systems with nonlinear coupled constraints or costs, and the distributed optimization methods for DMPC.

## EDUCATION

---

**Beijing Institute of Technology (BIT)**, Beijing, China

2022 - 2026 (expc.)

Ph.D. candidate in School of Automation

Research Directions: Optimization in DMPC; Iterative DMPC

Supervisor: Prof. Li Dai

**Beijing Institute of Technology (BIT)**, Beijing, China

2019 - 2022

M.Eng. in School of Automation, June 2022

Research Directions: Fuzzy clustering; Fuzzy association rule mining

Supervisor: Prof. Li Dai

**Qingdao University (QDU)**, Shandong, China

2015 - 2019

B.Eng. in Automation, June 2019

## PUBLICATIONS ( \* : corresponding author)

PATENTS \_\_\_\_\_

[P1] Li Dai, Yaling Ma, Runze Gao, **Jinxian Wu** et al. (2022). An automotive energy management method based on container and model predictive control. Chinese Patent, CN202210816336.X.

TALKS & PRESENTATIONS \_\_\_\_\_

“Distributed Fuzzy Clustering Based Association Rule Mining: Design, Deployment and Implementation”, *2021 China Automation Congress*, Kunming, Yunnan, China, August 2022.

TEACHING EXPERIENCE \_\_\_\_\_

Theory and Application of Stochastic Process (Fall 2019, Teaching assistant)

RESEARCH GRANTS \_\_\_\_\_

Principal Investigator, *Optimization-based control for resource-constrained autonomous unmanned systems*, BIT Research and Innovation Promoting Project (Grant No.2024YCX035), November 2024 to November 2025.

HONORS & AWARDS \_\_\_\_\_

<b>Outstanding Ph.D. Student (Top 1%)</b> , Beijing Institute of Technology	2024
<b>Outstanding Graduates (Top 1%)</b> , Beijing Institute of Technology	2022
<b>Best Paper Award of CAC 2021 (Top 1%)</b> , Chinese Association of Automation	2021
<b>Outstanding Master Student (Top 1%)</b> , Beijing Institute of Technology	2021
