STATEMENT

Jinxian Wu is a third-year Ph.D. student at the Beijing Institute of Technology. His research focuses on distributed model predictive control (DMPC), specifically on the iterative DMPC methods for linear/nonlinear systems with nonlinear coupled constraints or costs, and the distributed optimization methods for DMPC.

EDUCATION

Beijing Institute of Technology (BIT), Beijing, China 2022 - 2026 (expc.)

Ph.D. candidate in School of Automation

Research Directions: Optimization in DMPC; Iterative DMPC

Supervisor: Prof. Li Dai

Beijing Institute of Technology (BIT), Beijing, China 2019 - 2022

M.Eng. in School of Automation, June 2022

Research Directions: Fuzzy clustering; Fuzzy association rule mining

Supervisor: Prof. Li Dai

Qingdao University (QDU), Shandong, China 2015 - 2019

B.Eng. in Automation, June 2019

PATENTS _____

[P1] Li Dai, Yaling Ma, Runze Gao, **Jinxian Wu** et al. (2022). An automotive energy management method based on container and model predictive control. Chinese Patent, CN202210816336.X.

TALKS & PRESENTATIONS _____

“Distributed Fuzzy Clustering Based Association Rule Mining: Design, Deployment and Implementation”, 2021 China Automation Congress, Kunming, Yunnan, China, August 2022.

RESEARCH GRANTS _____

Principal Investigator, *Optimization-based control for resource-constrained autonomous unmanned systems*, BIT Research and Innovation Promoting Project (Grant No.2024YCX035), November 2024 to November 2025.

TEACHING EXPERIENCE _____

Theory and Application of Stochastic Process (Fall 2019, Teaching assistant)

ACADEMIC SERVICES _____

Reviewer for Journals

- IEEE Transactions on Automatic Control
- IEEE Transactions on Control Systems Technology
- IEEE Transactions on Intelligent Transportation Systems
- Automatica
- System & Control Letters

HONORS & AWARDS _____

Huawei Scholarship (Top 1%) , Huawei Technologies Co Ltd	2024
Outstanding Ph.D. Student (Top 5%) , Beijing Institute of Technology	2024
Outstanding Graduates (Top 1%) , Beijing Institute of Technology	2022
Best Paper Award of CAC 2021 (Top 0.5%) , Chinese Association of Automation	2021
Outstanding Master Student (Top 5%) , Beijing Institute of Technology	2021
